# TouchMonitor TM7 Series

**Modular Software ▪ Touch Screen ▪ Different I/O Options: Analog, AES3, AES3id ▪ Highly Flexible Screen Layout  
2-ch. PPM/True Peak ▪ Multichannel ▪ Loudness and SPL ▪ RTA ▪ SSA ▪ Radar Loudness ▪ Premium Peakmeter**

The TouchMonitor TM7 range enters a new level of professional audio metering in terms of precision, performance, efficiency and flexibility. The units are equipped with high-grade 7" touch screens, an easy-to-use graphical user interface, and several audio interfaces.

TouchMonitor TM7 handles audio signals using different audio interfaces: analog, AES3, and AES3id. The mixed use of the analog and digital audio interfaces allows the display of up to 16 input channels simultaneously.

## **Graphical User Interface**

The graphical user interface used in the TouchMonitor range is controlled simply by using your finger. Instruments can be scaled, randomly positioned and combined for optimized use of available screen space. Multiple instruments of the same type, assigned to different input channels and configurations, can be displayed simultaneously. A comprehensive on-screen help feature supports the user to make setup changes with ease.

## **Licences**

A totally modular software concept means that you only have to purchase features that you actually require. This puts you in control, defining the functionality of an individual TouchMonitor that suits your needs best. At any time new instruments and functions can be added to the device as software modules simply by purchasing and activating a corresponding licence.

# Software

## Standard Software

Every TouchMonitor comes with a basic software package. Beside the signal processing (two channels at a time) and the control functions this software includes a Stereo-PPM with analog scales (DIN5, Nordic, British IIa, British IIb) and digital scales (0 to -60 dB, +3 to -60 dB TruePeak, DIN5, Nordic, British IIa and IIb), peak hold, peak memory, Over indicators and phase meter. Optionally, different software modules are available as licences.

## Software Modules (Licences)

Software modules can be ordered as licences either together with the order of the main unit and the selected audio interface or at a later point in time. Together with the order of the main unit the licence will be activated at delivery.

When a licence is needed at a later point in time, the order process is started from the "Licences" menu of the TM7 unit. A device-specific file for forwarding to RTW is created by the unit. RTW will give back a corresponding file with the activated licence for exactly this unit.
